## **Amendments to the Claims:**

The following listing of claims will replace all prior versions and listings of claims in the application.

## **Listing of Claims:**

- 1. (currently amended) A method of producing a local <u>and a systemic</u> immunogenic response in a buccal mucous membrane, saliva, and lymph nodes draining said mucous membrane, the method comprising administering in the floor of a primate's mouth a composition comprising an immunogen specific for a pathogenic agent having a gateway into the buccal mucous membrane, wherein a local <u>and systemic</u> IgA antibody and IgA antibody-producing B cell response is induced.
- 2. (original) The method of claim 1 wherein the IgA antibody is a secretory IgA antibody.
- 3. (previously presented) The method of claim 1 wherein said administering is by sublingual injection, deposition, bioadhesive, or capsule that releases the composition in the floor of the mouth.
- 4. (previously presented) The method of claim 3 wherein the bioadhesive or capsule contains or is coupled to a system that promotes penetration of the composition.
- 5. (previously presented) The method according to claim 1 wherein the immunogen is from a pathogen chosen from the group consisting of HIV, herpes viruses, candidae, hepatitis viruses, picornaviridae, reoviruses, adenoviruses, human papillomavirus, cytomegalovirus, Epstein-Barr virus, and aerosol transmitted pathogens.
- 6. (withdrawn)
- 7. (withdrawn)
- 8. (previously presented) The method according to claim 1, wherein the immunogen is from HIV.
- 9. (original) The method according to claim 8, wherein the immunogen is gp160.
- 10. (previously presented) The method according to claim 1, wherein the primate is a human.
